Video Labs Welcomes New Additions to its Format Family

\$50 off your next Final Cut or motion menu service (with a minimum order of \$500) when you sign up for our e-newsletter.

**Expiration 04/30/08
122008-A**

Just in Time for Spring . . . our flock is growing!

Major editorial houses choose Final Cut Pro as their preferred editing tool and Video Labs now joins that family. Final Cut Studio 2 along with the Kona 3 SD HD PCIe capture card delivers high-performance digital non-linear editing, native support for virtually any video format (including HD and PAL standards) and integration with our high quality DVD authoring and encoding programs. For more details, please visit our website www.videolabs.net.

And growing . . . **Add Some Motion . . . and get noticed!**

Budgets can be tight for DVD authoring projects, but Video Labs creative team has some ways to add motion to your menu while keeping an eye on costs. Our custom-designed motion backgrounds for DVD menus that will add the professional touch you need and enhance your message. To preview our motion menu templates, check out our website www.videolabs.net or contact your sales representative for more details. Your feedback is important – so let us know what you think!

And growing . . . **Betacam SX & Canon HDV Added to our Flock - new formats, new capabilities, more capacity**

Responding to our client needs, Video Labs has added a new Sony DNW-75 Betacam SX Hybrid record & edit deck to its extensive family of videotape formats. With 4-channels of 48 khz, 16-bit digital audio and 4:2:2 component digital video, the SX record deck will help us support clients ever-expanding needs for the latest formats and capabilities. All our of SX equipment is compatible with BetaSp tapes.

Ever mindful of our clients' changing workflow, we've also added the Canon HDV HVR-M10U playback deck that allows for 1080i video. Paired with our Sony HDV record deck, we can now provide HDV cloning capability.

Our expanding flock of videotape formats includes HDCam, DVCPPro & DVCPPro HD EX, H-DV, IMX, DVCam, Digital Betacam, BetaSP, BetaSX, MiniDV and more.

All your video needs under one roof:
